Timber Treatment

At Blackdown Buildings all timbers are pressure impregnated with preservative by our parent company Brookridge Timber.

Our standard buildings are supplied using Treated Pine/Douglas Fir for the upright timber columns.

It is important when choosing timber as your preferred frame material that the right species is selected and timber in ground contact is treated using the correct treatment cycle (**Use Class 4**).

Further information on treatment is available on request.

Column Upgrade

For Improved Service Life

A) Oak

To improve the service life of the building, Structural Oak Columns can be supplied which are very durable and naturally more resistant against fungal decay and insect attack.

From £120.00 + VAT per extra column

B) Steel shoe

A range of Steel Brackets / Shoes are available to suit various post sizes.

From £84.95 + VAT per extra column
